MEMORANDUM FOR THE RECORD

SUBJECT: High Precision Stereo Comparator Program

25X1  
25X1  
1. The project monitor had a telephone conversation with [redacted] General M nager, on 16 December 1969. [redacted] stated that [redacted] has reported daily on his monitor trip to [redacted] the optical subcontractor.

25X1  
25X1  
25X1  
2. The following items were reported by [redacted]

a. The main things important to the stereo comparator optical system are OK. The optical components look good; only minor optical rework is required.

b. The interfacing (wiring, drives, etc.) are being straightened out without any major difficulty.

c. [redacted] expects to have each item tested and in the system by the end of February.

d. The end of February looks like a good date for [redacted] to start acceptance tests on the optical system at [redacted]

e. [redacted] has spent time during this monitor trip in setting up test procedures with [redacted]

f. [redacted] and probably [redacted] will return to [redacted] early in January to work up the test plan and procedures for the acceptance tests. This may take about two weeks to accomplish.

g. [redacted] will leave [redacted] on 18 December and be at [redacted] on 19 December.

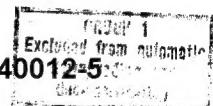

3. The project monitor will be in telephone contact with [redacted] on 22 December to get a summary report on the [redacted] trip.

4. [redacted] also stated that [redacted] have been working with [redacted] on an acceptance test for the correlation (image analysis) system. The main hangup is the correspondence test. [redacted] feels that the test recommended by [redacted] to check cross talk correspondence is unsatisfactory. [redacted] is trying to come up with a better test.
